 Bucharest, Romania

EDUCATION

University Politehnica of Bucharest
Faculty of Automatic Control and Computer Sciences
 October 2023 – Ongoing  Bucharest

"Gheorghe Munteanu Murgoci" National College
Mathematics and Informatics
 2019 – 2023  Braila

PROJECTS

Mini-libc
Programming language used: C

- Implemented multiple functions using system calls.
- Gained a deeper understanding of how C interacts with the operating system.

Memory Allocator
Programming language used: C

- Developed a basic memory allocator from scratch.
- Improved knowledge of low-level memory management in C.

Suffix Tree
Programming language used: C

- Constructed a suffix tree for efficient string processing.
- Worked extensively with pointers and dynamic memory allocation.
- Implemented depth-first search (DFS) for tree traversal.

SAT Solver
Programming language used: C++

- Designed a SAT solver using backtracking.
- Optimized performance with the DPLL algorithm.

Museum Database Management System
Programming language used: Java

- Developed a database application for managing museum visitors and guides.
- Implemented functionalities for tracking visitor records and scheduling guides.

SKILLS

Programming Languages
C/C++, Matlab, Java, Racket

LANGUAGES

Romanian 

English
